

Primary PBL Data

Use this folder for the core dashboard and program intelligence workflow.

Monthly CSV Files

The `csv_exports` folder contains one CSV per reporting month:

- `PBL_School_Response_Data_July_2025.csv`
- `PBL_School_Response_Data_August_2025.csv`
- `PBL_School_Response_Data_September_2025.csv`

Each file uses the same translated survey-style columns, plus derived fields for total enrollment, total attendance, attendance rate, and risk status.

Candidate Notes

Candidates should combine the three monthly CSVs during import if their application needs a single table. District-level and block-level summaries can be computed from these files.
